CONFEA Standard Construction Daily Report

Different Models

Printable forms for the Construction Daily Report with high, medium and low density, for signature collection or digital certificate.

Differentials

Flexible License

Pay per work in use. You decide the investment amount according to your company's profile.

User-friendly and simple to use

RDOWEB's learning curve is smooth, with objective screens that are simple to operate.

Real technical support

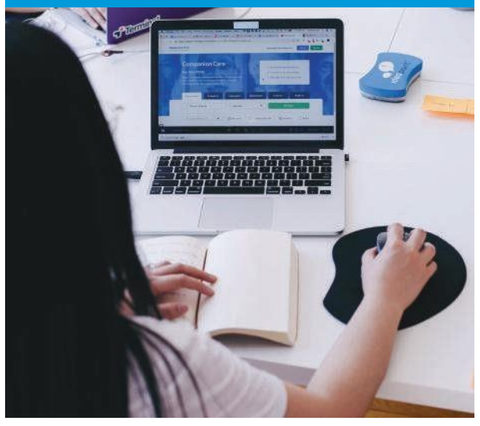

Talk to us by phone or chat, download operation manuals, open calls by email, share screens, and clear doubts with area technicians at no additional cost.

Browser Access

The platform does not require additional software. Use a simple web browser of your choice.

Daily Report

RDOWEB transforms field notes into monitoring indicators, bringing transparency and reliability to the information and establishing an interactive and secure communication channel between the construction company, management company, and the end client.

Types of Works

The platform tracks information from different types of construction sites and issues RDOs digitally.

Civil

Fast and accurate answers obtained through reports generated in real time.

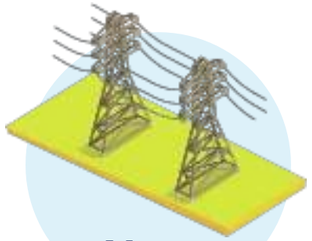

Infrastructure

Objective tracking of field notes throughout the duration of the project.

Industrial

Control of highly complex processes with a large volume of information.

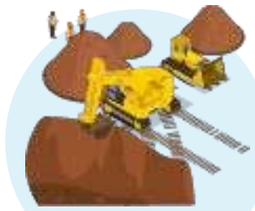

Linear

Propagation of information throughout the work, no matter how long it is.

Management

Data collection and control through standard adherence to norms, without using paper.

Earthmoving

Daily monitoring of climatic factors, facilitating the planning of the work.

Works of all kinds

With RDOWEB you control information from different types of construction sites without the need for paper. The platform has flexible licensing allowing its use in small, medium or large works.

About the Company

Webdutos

Specialized in softwares for engineering companies, with solutions used to support the management of works in various segments, such as pipeline construction, infrastructure, industrial assembly, and civil construction.

Some customers

The best way to get to know us is through those with whom we work. The degree of satisfaction in the experience of our clients and partners is the best indicator of our work.
